

# Open Source for Open Science

# I am Ayush Garg

The Author of **pygetpapers**

An Open Source tool supporting automated retrieval of  
scientific literature

pygetpapers is a tool to assist text miners. It makes requests to open access scientific text repositories, analyses the hits, and systematically downloads the articles without further interaction.

```
class Pygetpapers:
    """[summary]"""

    def __init__(self):
        """This function makes all the constants"""
        self.crossref = CrossRef()
        self.arxiv = Arxiv()
        self.europe_pmc = EuropePmc()
        self.rxiv = Rxiv()
        self.rxivist = Rxivist()
        self.download_tools = DownloadTools("europepmc")
        self.version = self.download_tools.get_version()

    @staticmethod
    def handle_adding_terms_from_file(args):
        """This functions handles the adding of terms to the
```

INPUT:

```
pygetpapers --api rxivist -q "biomedicine" -k 10 -c -x -o "biomedicine_rxivist" --makehtml -p
```

OUTPUT:

```
WARNING: Pdf is not supported for this api
INFO: Final query is biomedicine
INFO: Making Request to rxivist
INFO: Making csv files for metadata at C:\Users\shweata\biomedicine_rxivist
100%|
INFO: Making html files for metadata at C:\Users\shweata\biomedicine_rxivist
100%|
INFO: Making xml files for metadata at C:\Users\shweata\biomedicine_rxivist
100%|
INFO: Wrote metadata file for the query
INFO: Writing metadata file for the papers at C:\Users\shweata\biomedicine_rxivist
100%|

**pip install pygetpapers**

**What motivated  
me to  
contribute to  
open source?**

# Medium Behind Human Progress

- Science is all about asking questions
- Every question that we ask leads to creation of 10 more
- Humanity comes together to collectively solve these questions

# OPEN AND INCLUSIVE SCIENCE

## PROMOTE FREE AND OPEN ACCESS

## PYGETPAPERS X CEVOPEN

**OPEN SCIENCE**

pygetpapers

# Who can do science and contribute to open source?

Is with people wearing white labcoats?

# Scientists vs Musician

Catch that **motivation** and  
**inspiration** and the rest will  
become history.

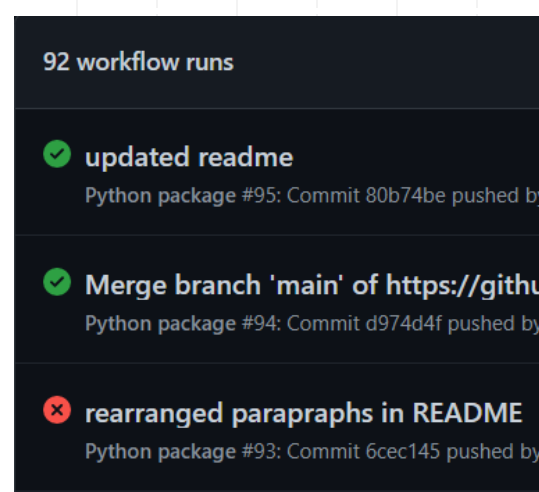

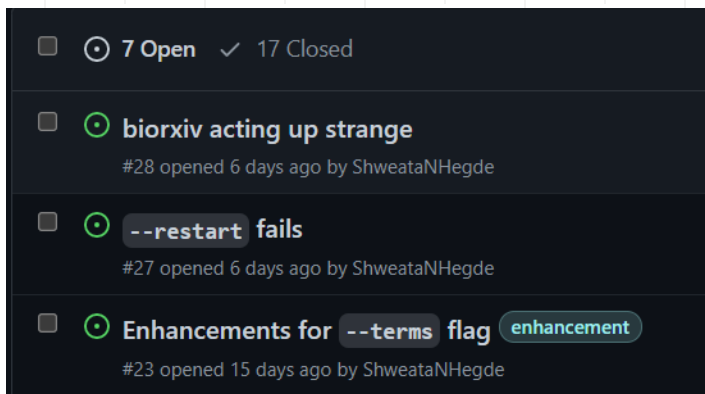

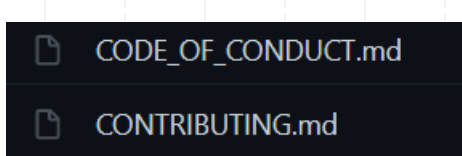

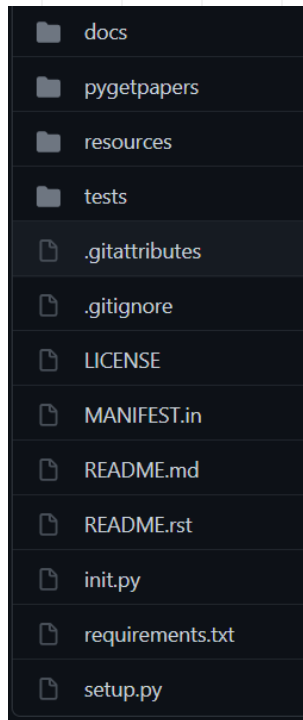

# What makes good open source ?

- **Code conformance**
- **Documentation**
- **Flawless packaging**
- **Good issues**
- **Unit tests**

- **code of conduct**
- **license**
- **contributing**
- **workflows**

Don't ever let anything stop you from fulfilling your passion of contributing to science.

“

*A piece of knowledge, unlike a piece of physical property, can be shared by large groups of people without making anybody poorer – Aaron Swartz*
